PROFESSIONAL SUMMARY

Full Stack Engineer with 2+ years of experience building scalable web applications used by thousands of users using React, Next.js, TypeScript, and Node.js. Proven track record of improving page speed by over 30%, optimizing performance, implementing authentication systems, and enhancing SEO and Core Web Vitals. Passionate about building high-quality, performant web applications and a highly motivated, fast-learning, collaborative team player.

TECHNICAL SKILLS

Frontend Development

React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend & Databases

Node.js, RESTful APIs, JWT, OAuth, Single Sign-On (SSO), MySQL, Firebase, WordPress

Tools & Analytics

Git, GitHub, NPM, Webpack, Google Tag Manager (GTM), Google Search Console, Lighthouse, Jira, Agile Methodologies, UI/UX, Figma

Testing & Quality

Postman, GitHub Actions (CI/CD), Code Review, Debugging, Performance Testing

WORK EXPERIENCE

Full Stack Engineer

Sep 2023 – Present

OpenSooq | Amman, Jordan

- Architected and optimized complex filtering functionality using Context API and Zustand, improving navigation and user experience.
- Integrated Google Tag Manager (GTM) tracking and logging systems to capture user interactions and support reporting.
- Spearheaded SEO and Core Web Vitals improvements utilizing Google Search Console and Lighthouse.
- Implemented Single Sign-On (SSO) features, handling authentication and multiple login options for users.
- Worked on Spotlights, Commercial Ads, and Listings Comparison features to improve visibility and engagement.
- Optimized JavaScript bundles with code splitting, boosting Core Web Vitals more than 40%.
- Reduced page load time by 2.5+ seconds through build enhancements.
- Resolved SEO issues, including broken links, redirects, and server errors (4xx, 3xx, 5xx), improving site indexing, crawl efficiency, and search engine performance.
- Removed unnecessary dependencies, reducing bundle size, build complexity, and potential security risks, while fixing memory leaks.
- Diagnosed and fixed a critical backend bug and solved issues in worker processes, improving system reliability and uptime.
- Participated in SEO and business requirement meetings, analyzed documentation, communicated requirements clearly, and coordinated effectively with outsourcing teams.

- Completed a highly selective, intensive 7-month full-stack development bootcamp.
- Developed responsive, data-driven web applications from scratch utilizing React, Node.js, and relational databases.
- Gained practical, hands-on experience designing REST APIs, managing version control via Git, and executing collaborative team-based project development.

- Managed academic book supply processes, procurement, and inventory tracking across multiple university departments.

PROJECTS

React Perfect Gallery (NPM Package)

GitHub | NPM

React, TypeScript, CSS3

Published an open-source NPM package providing a highly reusable, accessible image gallery component featuring mobile-first design and infinite scrolling capabilities.

Mobile Date Picker (NPM Package)

GitHub | NPM

React, JavaScript, CSS3

Engineered and deployed a mobile-optimized date picker component with touch-friendly controls and customizable styling for the React developer ecosystem.

EduSpark Platform

GitHub

React.js, Node.js, Express, MySQL

Developed an educational platform bridging students and course creators, featuring secure material sharing and interactive online course accessibility.

TableXpress

GitHub

React.js, Node.js, Tailwind CSS, Bootstrap, MySQL

Built a full-stack restaurant reservation system incorporating location-based filtering, cuisine classification, and real-time availability tracking.
